And you thought dying once would be hard...

On the morning before her 67th death, it is business as usual for agent Jesse Sullivan: meet with the mortician, counsel soon-to-be-dead clients, and have coffee while reading the latest regeneration theory. Jesse dies for a living, literally. Because of a neurological disorder, she is one of the rare people who can serve as a death surrogate, dying so others don't have to.

Although each death replacement is different, the result is the same: a life is saved, and Jesse resurrects days later with sore muscles, new scars, and another hole in her memory. But when Jesse is murdered and becomes the sole suspect in a federal investigation, more than her freedom and sanity are at stake. She must catch the killer herself--or die trying.
