In a solar system where The Authority decides who lives and who dies, only one of their own executioners can stop them.

Glade Io is a trained killer. Marked at a young age as an individual with violent tendencies, she was taken from her family and groomed to be a Datapoint—a biotech-enabled analyst who carries out the Culling. She is designed to identify and destroy any potential humans that threaten the colonies: those marked as lawbreakers, unproductive or sick.
